Professional Summary

Computer Science undergraduate (B.Tech, 2026) skilled in Python, Flask, Selenium, and Scikit-learn. Built a Flask CRUD application with CSV storage, Selenium and BeautifulSoup automation bots, and a Streamlit dashboard for K-Means, DBSCAN, and Hierarchical clustering results. Proficient in object-oriented programming, REST APIs, debugging, and file handling.

Training

Agritech Internship | **Certificate**
Swecha

- Completed the **Swecha Agritech Internship** and earned a completion certificate (linked above).
- Applied Python programming and debugging skills to agriculture-technology project tasks.

Company Training | **Certificate**
CCC

- Completed the **CCC company training** program and earned a completion certificate (linked above).
- Practiced software development fundamentals with Python and Git during the program.

Projects

K-Means Clustering for Evaluating Student Learning Behavior | **GitHub-link** | *Python, Scikit-learn, Streamlit*

- Built a Python machine learning pipeline that **groups students by learning behavior** using K-Means, DBSCAN, and Hierarchical Clustering.
- Preprocessed data with feature scaling and reduced dimensions with PCA before clustering.
- Created a **Streamlit dashboard** that visualizes cluster results and learning patterns.
- Compared the three clustering algorithms to identify distinct learner groups.

Student Record System | **GitHub-link** | *Python, Flask, HTML, CSV*

- Developed a **Flask CRUD web application** to add, view, update, and delete student records.
- Stored records persistently in **CSV** files, with form-based data entry in HTML.
- Added input validation and error handling to reject invalid entries.
- Structured the app with Flask routes and HTML templates.

Bot Automation | **GitHub-link** | *Python, Discord, Selenium, BeautifulSoup, PyAutoGUI*

- Developed Python tools that **automate repetitive workflows** and extract web data.
- Automated browser actions with Selenium and PyAutoGUI and parsed page data with BeautifulSoup.
- Implemented file processing and task automation to cut repetitive manual work.
- Integrated a Discord bot with Python scripts to trigger automated tasks.

Technical Skills

Languages: Python, Java, C, JavaScript, SQL
Web & Backend Development: Flask, HTML, REST APIs, CRUD Applications
Data & Machine Learning: NumPy, Pandas, Scikit-learn, Streamlit
Automation: Selenium, BeautifulSoup, PyAutoGUI, Web Scraping
Databases: MySQL, MongoDB
Developer Tools: Git, GitHub
Core Concepts: Object-Oriented Programming, REST APIs, Debugging, Error Handling, File Handling
Key Coursework: Operating Systems, Object-Oriented Programming

Education

Anurag University — Hyderabad, Telangana
Bachelor of Technology in Computer Science, CGPA: 7.80/10.0 — *2022 – 2026*

Sri Chaitanya Junior College — Hyderabad, Telangana
Intermediate Education, Percentage: 90.02% — *2020 – 2022*

Achievements & Certifications

- **Cisco Certified:** Python Essentials 1 & 2 and CCNA Enterprise Networking, Security and Automation.
- Earned certifications in **Operating Systems** (Scaler), **CSS3** (Infosys), and **HTML5** (Springboard).
- Participated in the **Hackorio Hackathon**.

Coding Profiles

- **LeetCode**
